## Table of Contents

<b>1. Introduction .....</b>	<b>3</b>
1.1 Purpose.....	3
1.2 Problem Statement.....	3
1.3 Project Scope .....	3
1.4 Aims & Objectives .....	4
<b>2. Overall Description .....</b>	<b>5</b>
2.1 Product Perspective .....	5
2.2 Benefits of VR Booking Hub... ..	5
2.3 User and Characteristics .....	6
2.4 Operating Environment .....	7
<b>3. Feature Description.....</b>	<b>7</b>
<b>4. Stakeholder.....</b>	<b>9</b>
<b>5. Specific Requirement.....</b>	<b>10</b>
5.1 External Interface Requirements .....	10
5.2 Functional Requirements.....	11
5.3 Non-functional Requirements .....	12
<b>6. Use Case Diagram .....</b>	<b>13</b>
6.1 Activity Diagram and Description.....	15
<b>7. User Scenarios .....</b>	<b>20</b>
7.1 User.....	20
7.2 Property Manager.....	21
7.3 Admin .....	21
<b>8. System Architecture .....</b>	<b>21</b>
8.1 Frontend Design Overview .....	21
8.2 Prototype in Figma .....	21
<b>9. Prototype Screenshots .....</b>	<b>22</b>
<b>10. Conclusion .....</b>	<b>26</b>
<b>11. Appendix.....</b>	<b>26</b>
<b>12. References .....</b>	<b>27</b>

## VR Booking Hub

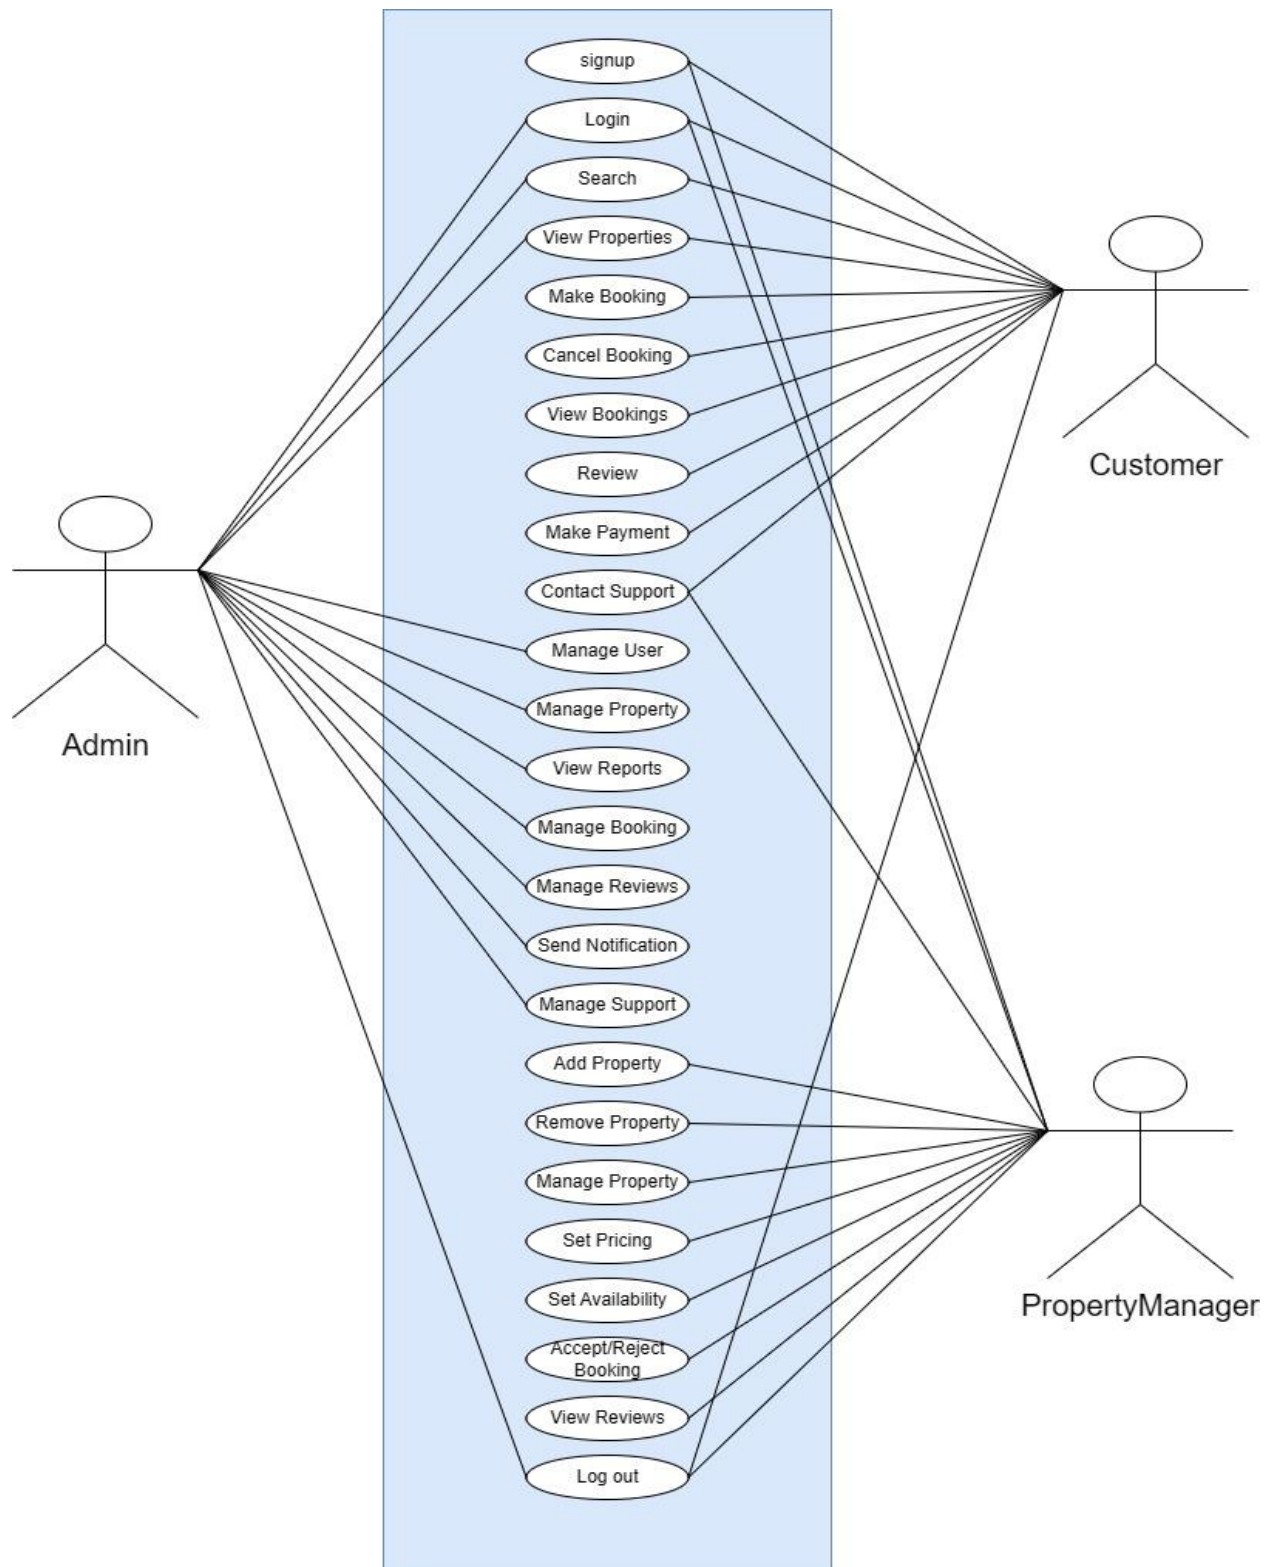

Figure – Use case Diagram

## 10. Conclusion

The Virtual Booking Hub revolutionizes the concept of booking accommodation by seamlessly incorporating virtual reality (VR) and real-time booking services. It assures clients with an interactive virtual showing of properties in which they are interested in enhancing the online booking experience thus reducing cancellations. Property managers get better listing management and/or marketing opportunities enabling customer interaction and accommodation visualization.[23]

The Virtual Booking Hub intends to become the go-to platform for modern travelers and landlords hence changing the way bookings are done. Getting down to business, the following steps involve carrying out a thorough design, development, and testing of the platform in addition to integrating feedback with development for it to fit the users and robustly perform within the market.[23]

## 11. Appendix

### Team Credits:

#### **1. Prottasha Islam Nahid:** Project Manager

Contribution: Organized team meetings, and divided tasks for every member of this group. Complete the topic of Introduction, Overall Description, and Feature Description. Ensured deliverables were completed on time, and managed document compilation and review.

#### **2. Mahmuda Islam:** UI/UX Designer

Contribution: Mainly Design our website prototype. On the other hand, these documents are parts of User Scenarios and System Architecture written by her.

#### **3. Sharna Rani Saha:** UI/UX Designer

Contribution: Mainly Design our website prototype. Also, wrote this document parts of Prototype screenshots and conclusion.

#### **4. Raisul Islam Nahid:** Frontend Developer

**Contribution:** Basically, working in the front-end development. Also wrote this document part of the Specific Requirements and Use case diagram.

#### **5. Tanvir Ahammed:** Frontend Developer

Contribution: Working on front-end development. Also wrote this document part of Stakeholders.
